# N3C Orientation Sessions

February 2, 2021 - Part A

February 9, 2021 - Part B

Tuesday **February 2, 2021** | 8-9:30am PT/11am-12:30pm ET
Register for Part A
Tuesday **February 9, 2021** | 8-9:30am PT/11am-12:30pm ET
Register for Part B

Users of all types can learn how to use the N3C Data Enclave. Sessions are ongoing and will alternate week by week.

Session A - *Complete before attending Session B*

This session is for those who want to learn about N3C, as well as how to engage with project teams and access the data. Learning objectives:

- Provide a general overview of N3C, including goals, organization, and community resources such as Domain Teams and Data Liaisons.
- Introduces the 3 data tiers available and important considerations for research driven by the data harmonization process.
- Discusses resources for training and help, as well as the Data Use Request (DUR) process required for researcher access.

Session B - *Completion of Session A is a prerequisite*

This session is for analysts, statisticians, data scientists, or anyone who wants to gain a broader understanding of the tools needed to work with the data. Learning objectives:

- Focus on technical aspects of working with data in the secure N3C Enclave, including use of OMOP concept sets and N3C-specific tooling, such as the Concept Set Browser.
- Introduce commonly used analysis tools, such as Contour and Code Workbooks and corresponding workflows for simple analyses.
- Introduce the Enclave Knowledge Store, a mechanism for sharing and using community-developed code and data across projects.
